Information Systems Student Package

This package is tailored for Information Systems students, focusing on the integration and management of blockchain technology within organizational contexts. It provides a comprehensive understanding of how blockchain can enhance business processes and data management.

Package Includes:

Blockchain Basics: 6 hours of training on the fundamentals of blockchain technology.

Blockchain in Business: 8 hours of sessions on the application of blockchain in various business processes.

Data Management and Security: 8 hours of training on how blockchain can improve data integrity and security.

Implementation Strategies: 6 hours of workshops on planning and implementing blockchain solutions in organizations.

Support: 3 months of email support for implementation queries.

Price: $350 USD (Discounted from $700 USD)

Value Proposition:

1. Understand the business applications of blockchain.
2. Learn how to manage and secure data using blockchain.
3. Access practical implementation strategies and support.
