Computer Science Student Package

This package is designed for Computer Science students who want to delve deep into the technical aspects of blockchain technology. It covers the fundamentals as well as advanced topics, providing a strong foundation and practical skills.

Package Includes:

Blockchain Fundamentals: 6 hours of training on the basics of blockchain technology.

Smart Contracts and DApps: 8 hours of sessions on developing smart contracts and decentralized applications.

Blockchain Development: 10 hours of hands-on coding workshops using popular blockchain platforms like Ethereum and Hyperledger.

Capstone Project: 6 hours of guided project work to create a blockchain-based application.

Support: 3 months of email support for technical queries.

Price: $400 USD (Discounted from $800 USD)

Value Proposition:

1. Gain in-depth technical knowledge and skills.
2. Develop practical applications and projects.
3. Access expert guidance and resources.
